Core Competencies

Unified Communications: We integrate diverse data, voice and video systems and link them with key business processes.

Structured Cabling: Back-bone cabling, horizontal and vertical cabling, rack installations for data closets, telecommunications rooms, server rooms, including copper & fiber installation.

VOIP: We are providers of VOIP systems, deployment virtual and hardware PBX, and workstation phones

WIFI: IEEE standards 802.11b, 802.11g and 802.11a for deploying high performance, scalable wireless networks.

Audio Visual: Integration of videoconferencing, distance learning, installation of in-house public announcement systems

Network Support: Review IT procedures, network topology, server hardware configuration, evaluate stability of the internal network.

Network Design: Develop voice and data networks topology, provide or recommend IT/network procedures documentation.
